Summary

A versatile tech professional combining expertise as a CRM Functional Consultant, Data Scientist, and Backend Developer with proven experience at Optiven Limited. Skilled in developing data-driven solutions, including predictive models and analytics that enhance customer engagement and operational efficiency. Proficient in multiple technologies including Python, SQL, Django, and various machine learning frameworks.

Bringing a unique blend of technical expertise and business acumen, demonstrated through successful implementation of integrated systems that drive business growth and enhance customer experience. Committed to delivering innovative solutions in fast-paced, data-driven environments, with a strong foundation in both theoretical knowledge and practical application.

Experience

Optiven — **August 2024- present**
Data Scientist — Nairobi

At Optiven, a leading real estate company, I have leveraged advanced data analysis and machine learning to drive transformative insights that have shaped our business strategy. Collaborating with the data science team, I've developed predictive models and analytics solutions that forecast customer engagement and payment behavior, directly enhancing retention strategies and operational efficiency. My experience in managing and transforming large datasets, combined with proficiency in Python, SQL, and visualization tools, has enabled me to deliver actionable insights that fuel data-driven growth. I thrive in fast-paced, innovation-focused environments where data is pivotal to achieving business success

Optiven — **August 2024- present**
Backend Developer — Nairobi

I combine my expertise as a backend developer and data analyst to deliver impactful solutions across multiple platforms. I have Spearheaded the design and development of a robust CRM system tailored to enhance sales tracking and client relationship management.

Configured workflows, dashboards, and reporting tools to streamline sales processes and improve user experience.

Collaborated with cross-functional teams to integrate CRM with existing ERP systems, ensuring seamless data flow and improved decision-making.

Conducted training sessions for sales and marketing teams, driving adoption and maximizing CRM utility.Additionally, I contributed to the development of an ERP system using Django, enhancing our operational capabilities and data flow. My blend of backend development, machine learning, and data analysis skills enables me to create integrated, data-driven solutions that drive business growth and elevate customer experience.

Kapu Digital Solutions — **January - February 2023**
Digital Marketing Specialist — Nairobi

- Managed social media accounts, resulting in a 15% increase in followers within 2 months.
- Planned and executed influencer campaigns that drove a 20% increase in sales.

Upwork — **2020 - Present**
Freelance Developer

Mobile App and Website Development:

- Developed and delivered over 10 high-quality mobile applications and websites for various clients.
- Utilized technologies such as HTML, CSS, JavaScript, Python, and various app development frameworks to meet client specifications and deliver robust solutions.
- Conducted thorough testing and debugging to ensure seamless user experiences and functionality.
- Provided ongoing maintenance and updates based on client feedback and evolving project needs.

Odessy Writers — **September 2020-March 2022**
Online Writer

Authored over 20 insightful articles on the gaming industry and market trends.
